

Funding research and innovation Swedish Energy Agency

The Swedish Energy Agency is the major funder of energy research and innovation in Sweden. We also support businesses to develop, upscale and commercialise energy solutions and innovations

Michael Novotny

The Swedish Energy Agency: a major facilitator of a sustainable energy transition – 3 roles

- The Swedish Energy Agency is a steering, supporting and expert public agency in the energy field in Sweden.
- We use a broad mix of policy instruments where many parts of the innovation system from research and innovation to market, policy and regulation tools are integrated.

Accelerate the ongoing energy transition for a sustainable society

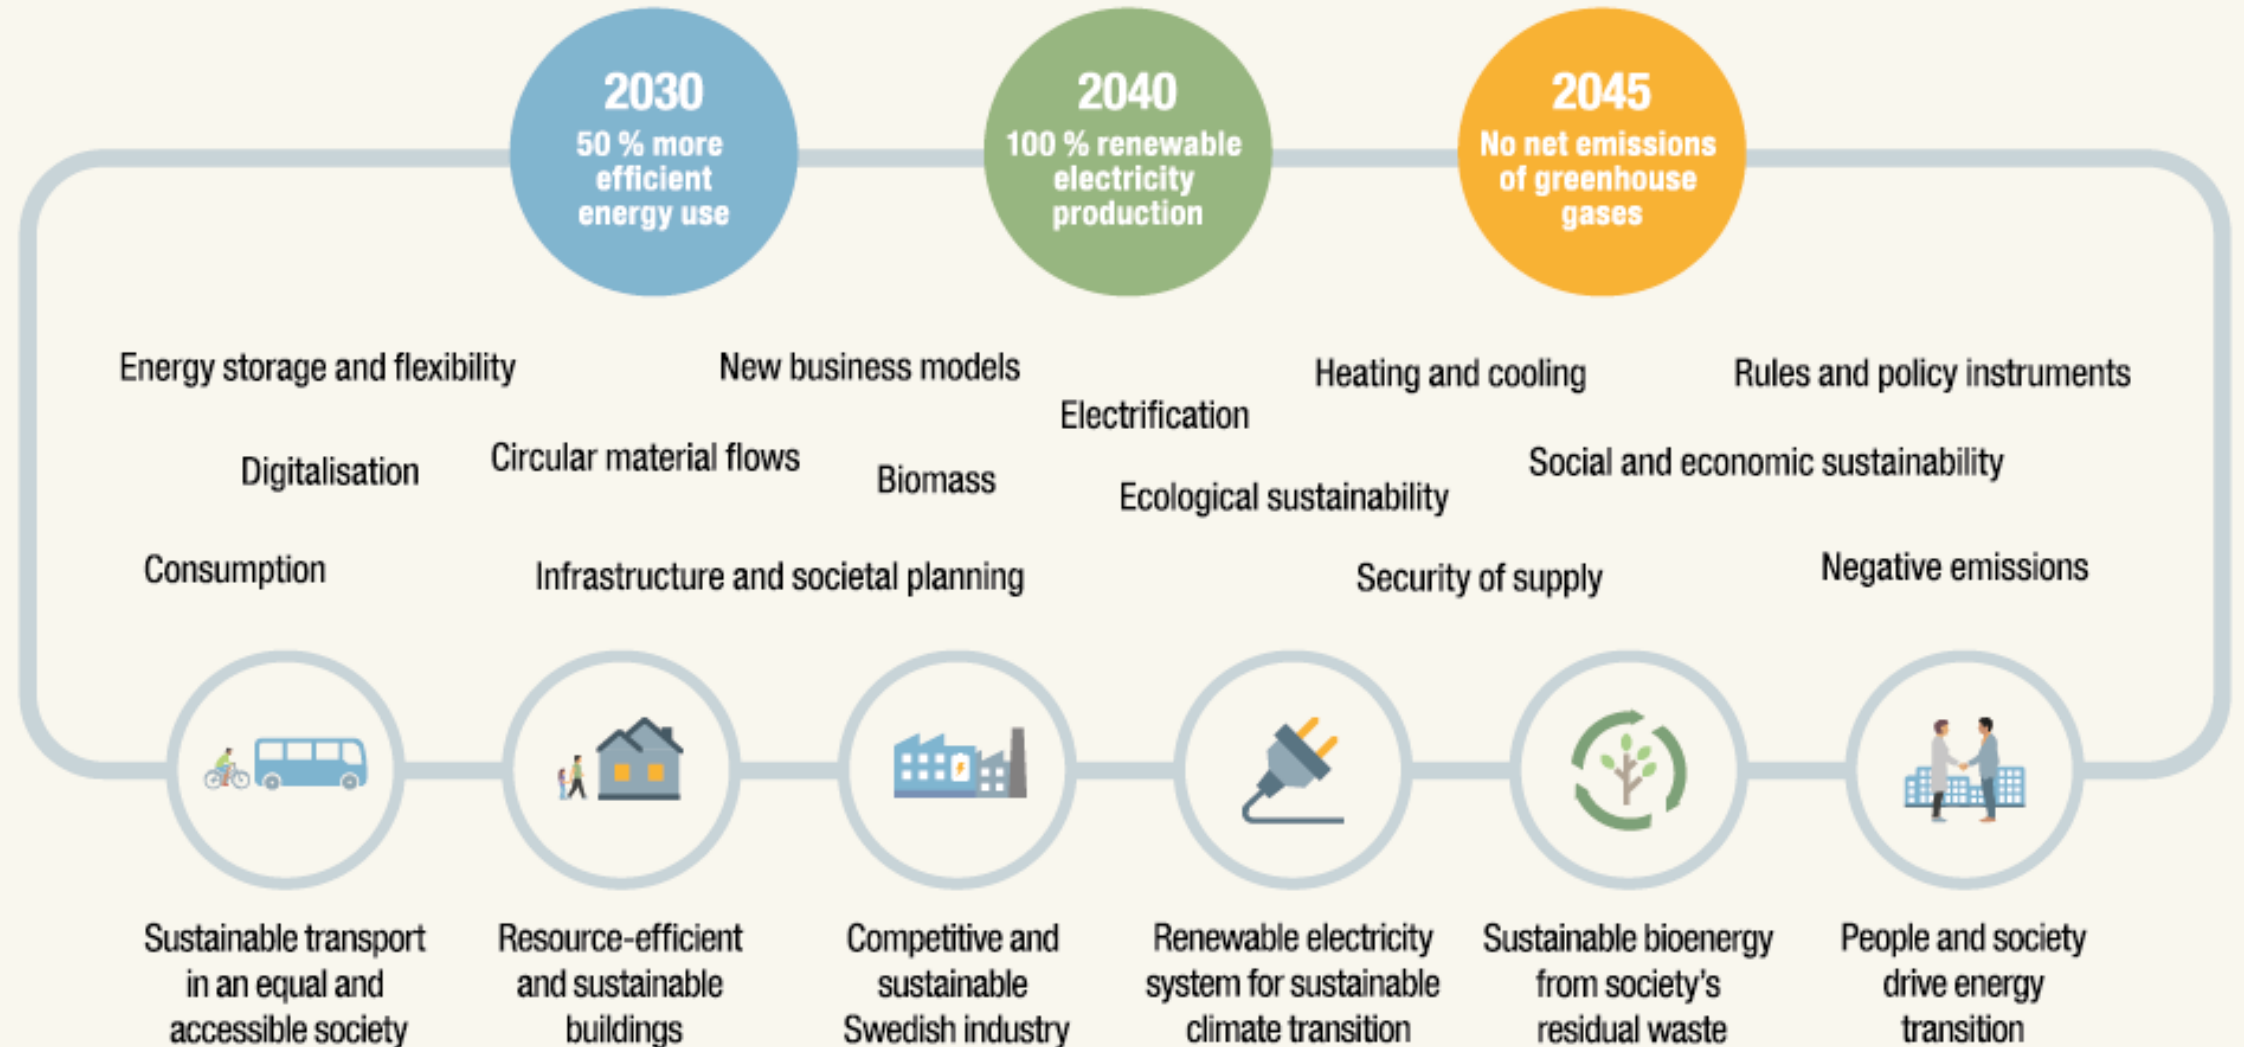

GLOBALA MÅLEN
för hållbar utveckling

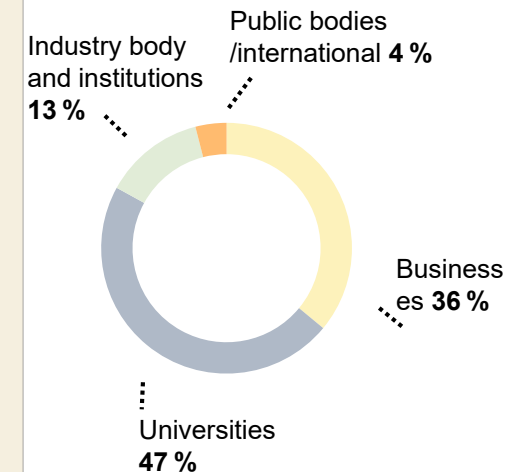

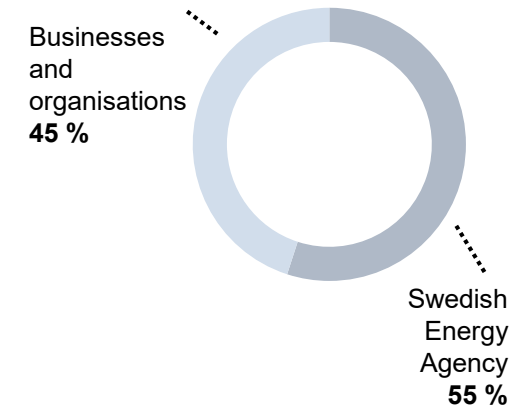

In order to tackle climate and energy challenges sustainable and systemic solutions must have a faster impact than today. The energy system needs a sustainable system transformation. Such a transformation will have an impact in most parts of society. Research and innovation are central for new knowledge and new solutions that make the system transformation possible.

Sweden shall be the world's first fossil-free welfare state

Research and innovation at the Swedish Energy Agency

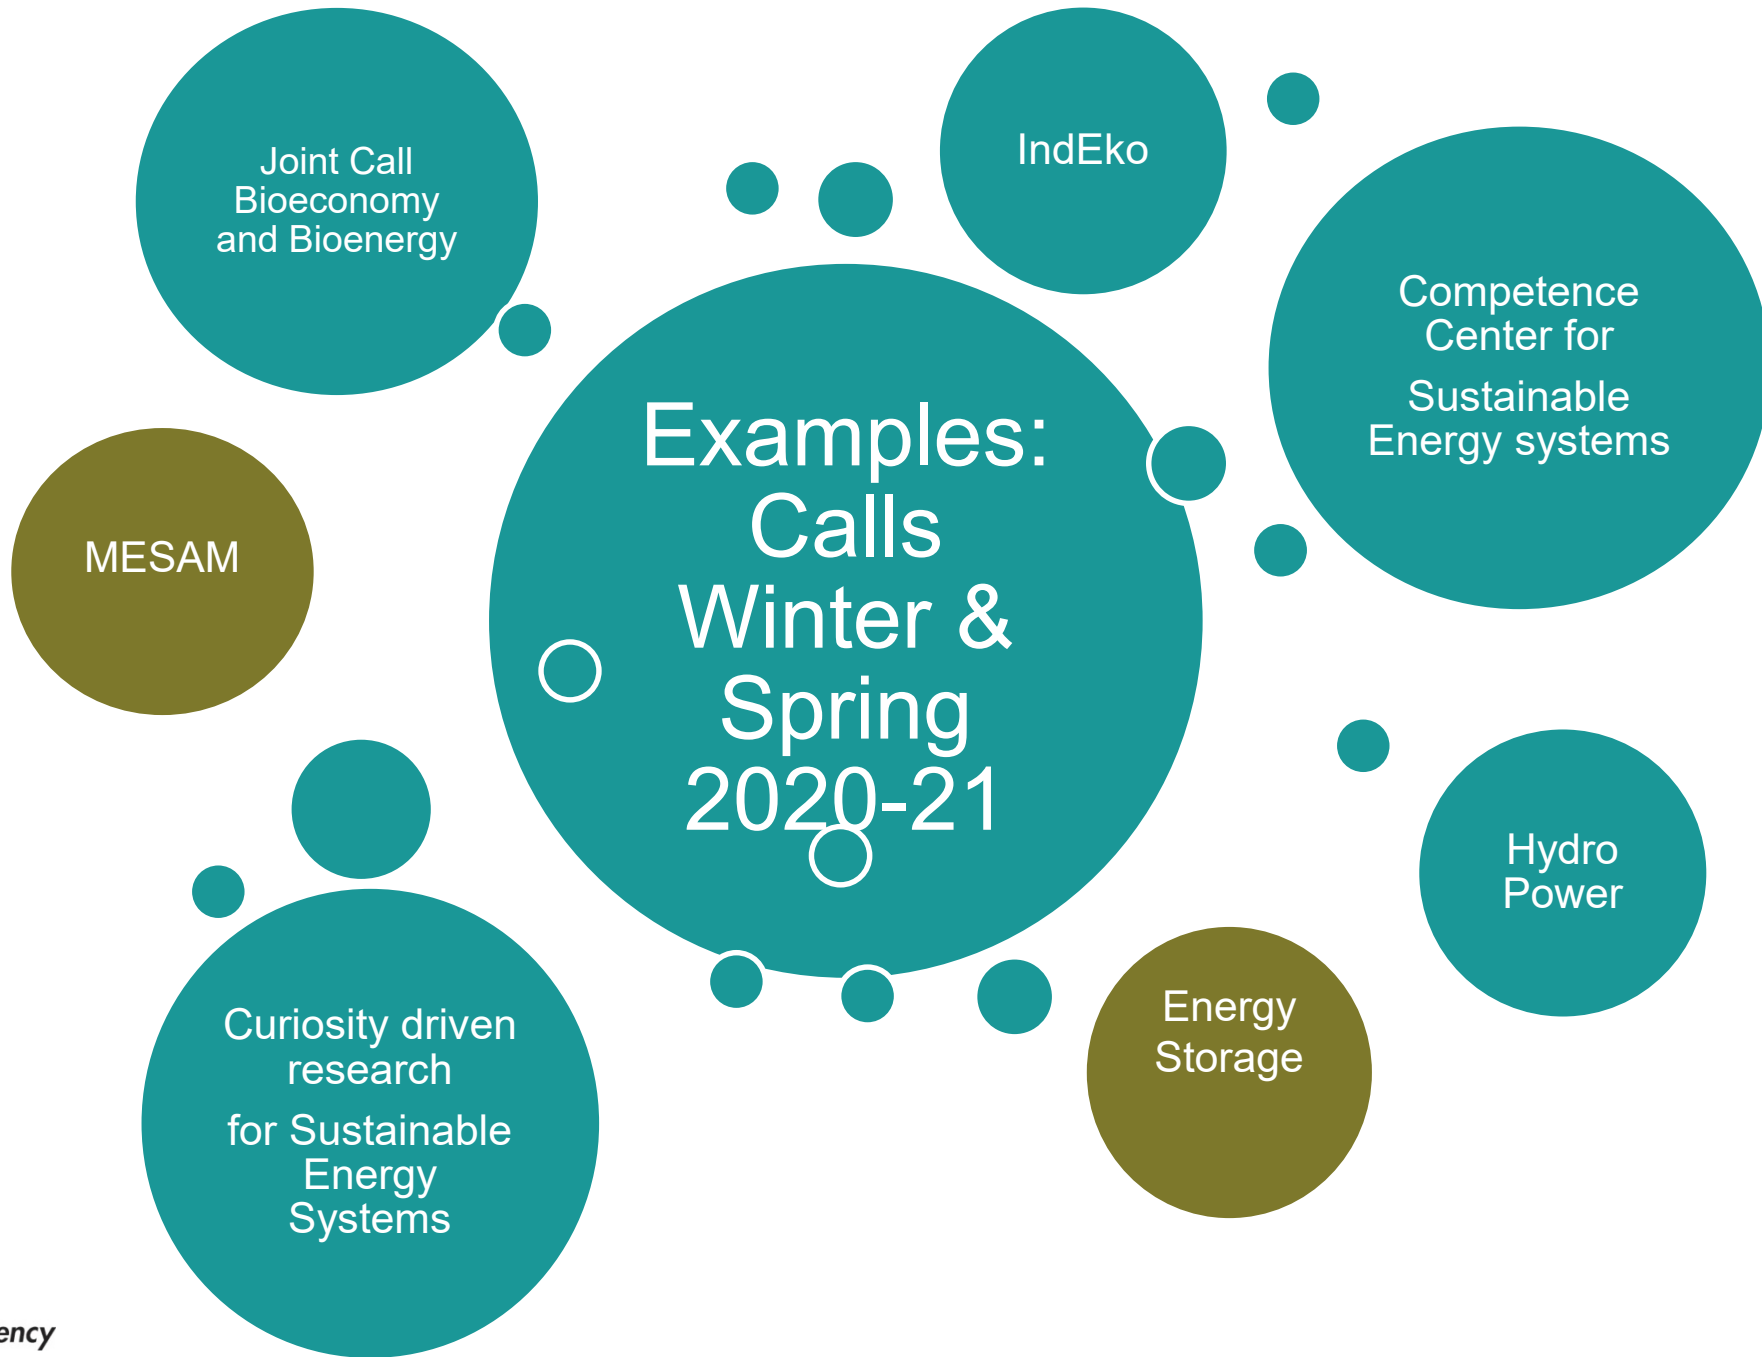

- Efforts across the innovation system
- Budget yearly approx. 1.6 Billion SEK (gov.ment funding)
- 50 programs, 2 000 projects
- 50 % co-financing from the business community

Funding announced through open calls

- Portfolio structured into various programs
- each program announces calls

Basis of assessment

Energy
relevance and
potential for
transition of the
energy system

Scientific quality
or innovation

Usefulness and
dissemination

Portfolio
relevance
(including
program and
call relevance)

Feasibility

As a research applicant for SWEA funding, also remember...

- You are part of an innovation system (most calls for proposal at SWEA require partnering with other organisations and domains)
- Your networks and the positioning of yourself, research groups, consortia, etc. are crucial
- In our calls you're supposed to have a structured dissemination plan, target groups of your results, even reference groups, not only plans for publication
- Start your application early on (read the manuals and research programmes)!!
- Ask your questions weeks before Call closure, attend info meetings from SWEA on specific calls
- Subscribe for Research calls on SWEA website
