

Weeks 34–36

General information

Work area Building 10

- Assembly of framework
- Refilling soil toward the basement walls.

Work area Building 9

- Roof and facade work
- Interior, plastering and installations

Work area Building 8 and at southern entrance

- Detail planning, foundation work.

Work area Building 24

- Installation work.

Work area between Building 5 and Building 7 (chemical storage room installation of new gas line)

- New gas line installation in consultation with affected organisations.

Work area Building 1 (Existing Ångström)

Disturbances

- Large deliveries of framework for Building 10
- Interruption to gas deliveries during installation of new gas line. Impacted parties are kept informed in a special forum for new gas line installations.

Closures, provisional arrangements

- According to general plan.
- When the gas is turned on after the new line has been installed, areas around the goods reception will need to be closed. Impacted parties will be informed.

Noticeable upcoming work (preliminary start times)

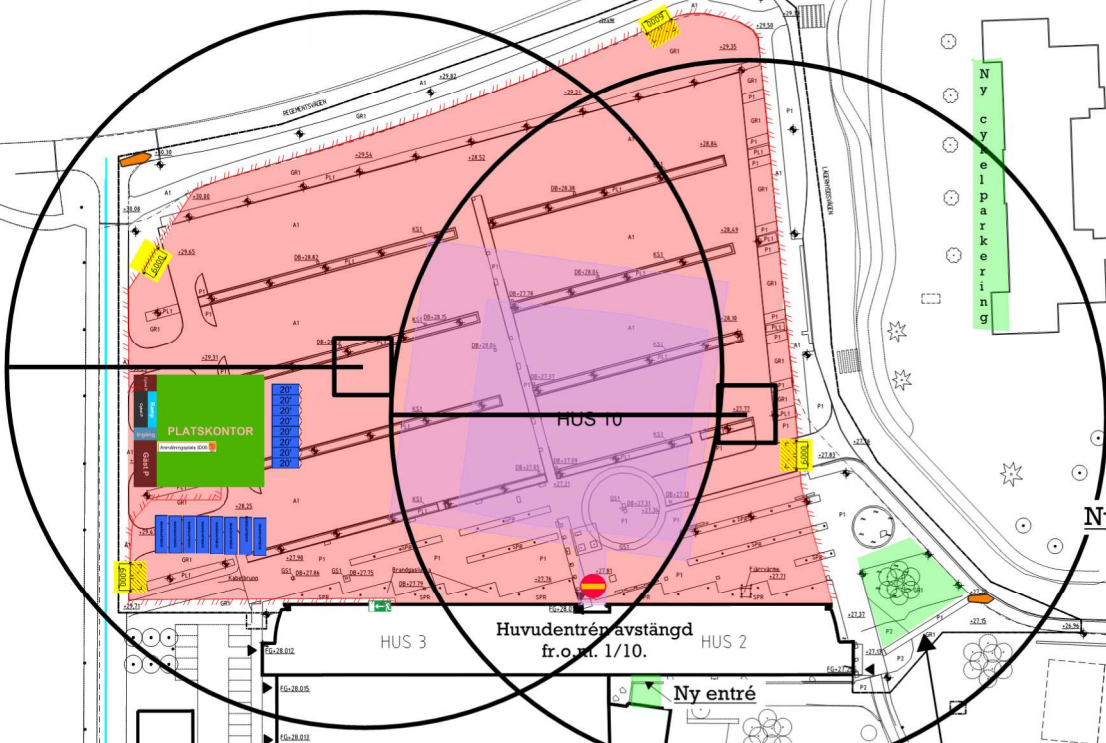

- Connection of sprinklers Building 9, Autumn 2019.
- Work with construction to connect Building 10 and Building 1 and installations and construction, late summer 2019. Impacts staff rooms and faculty rooms.
- Removal of concrete foundation between Buildings 5 and 7. Autumn 2019.
- Construction of chemical storage between Buildings 5 and 7.
